

**Returning Men to Honor: Batterers Intervention Programming in a Coordinated
Community Response Workshop on Wheels
April 16 – 17, 2019
Green Bay, WI
Registration Form**

This training will focus on offender accountability through a community response that coordinates the responses of service providers and court systems, highlighting the work of the Oneida Nation. The two day training will be split between a classroom setting and a working tour of the community. Day One of the training will cover the concepts and theories behind offender accountability through batterer intervention programming and accountability of court systems, providers, law enforcement, and probation to victim safety. Day Two will include a tour of the community – participants will meet with partners of the Oneida Coordinated Community Response (CCR) Team to gain working knowledge of how these projects are implemented.

This training is ideal for those who are looking to enhance their CCR team’s ability to enhance victim safety and increase accountability of offenders. Due to limited space, priority will be given to those who have batterer intervention programs, those who are looking to implement a BIP, and/or a coordinated community response team.
